

Honey Guy® personal care products

PRODUCT DATA SHEET

DESCRIPTION

Bite Free™ insect repellent cream is specially formulated to repel flying and creeping insects of all kinds. Bite Free™ insect repellent cream is environmentally friendly and made from the highest quality, non-toxic all natural ingredients, including de-ionized water, mineral oil, beeswax, natural mineral Borax and cosmetic grade oil of citronella, which provide long lasting protection. This non-greasy all-natural cream contains beeswax that provides an aromatic barrier film which discourages biting and stinging insects while it soothes existing bites.

TYPICAL CHARACTERISTICS

Appearance - White cream

Odor - Slight lemon fragrance, fruity, sweet

pH as supplied 6.5 – 7.5

Available in 0.5 oz. and 4 oz. (net wt) plastic containers

METHOD OF USE

Apply a small amount (about one tablespoon) to the palm of the hand or fingers and rub together in a washing action. Apply smoothly over the feet, ankles, legs, arms, hands, neck and other exposed body parts. Bite Free™ insect repellent cream is effective immediately, providing a protective film over the skin, giving up to 4 hours of protection. Bite Free™ skin cream is invisible, non-slippery and does not stain.

TYPICAL APPLICATIONS

Use Bite Free™ cream for quick relief from anything that bites, itches, burns or stings: gnats, mosquitos, fire ants, deer flies, sand flies, chiggers, ticks and fleas.

Bite Free™ cream has been designed as a general purpose repellent for discouraging attack by public health pests such as insects that can cause or transmit disease, or can cause human discomfort or injury. It is equally suitable for use by children and adults alike. Its proprietary formulation is water-resistant and locks in the skin's natural oil and moisture, providing a thin-film aromatic barrier shield that discourages attack by insect pests. Absorbs quickly, non-greasy. For all ages. Concentrated, use sparingly. For indoor and outdoor use.

Bite Free™ insect repellent cream

PRODUCT CLASSIFICATION

Bite Free™ cream is in group classification D.

Products in this group are all water-based and substantially neutral having pH values between 6 and 8.

U.S. Classification: USDA - E4.

All ingredients are listed in the U.S.N.F. (National Formulary) and the B.P. (British Pharmacopoeia) and are therefore recognized as safe to use.

LABELING

PRODUCT DESIGNATION: Universal Barrier Cream

PRODUCT CLASSIFICATION & SYMBOLS (C.P.L. Regulations):

This product is not classified under these regulations and therefore has no special labeling requirements.

Substance Identification Number: B4000

Primary Label Cautions (C.P.L. Regulations)

RECOMMENDED ADDITIONAL SAFETY INFORMATION:

Do not take by mouth. If ingested seek medical help. For external use only. Avoid contact with eyes. Do not use if you are pregnant. Consult with physician if unexpected condition persists.

When used according to directions, Bite Free cream is not expected to cause harm to humans, pets or the environment. Non-toxic, all-natural ingredients.

STORAGE:

Do not store at extremes of temperature. Keep from freezing. Some water separation is normal, stir to reconstitute.
